12	500
13	Unlimited

Resolution

Sage previously announced new U.S. payroll packaging and pricing for Sage 100 and Sage 300, to inform all customers that they must select a new Sage payroll option by April 30, 2017.

Many customers have already selected a Payroll subscription tier or taken advantage of the Sage Payroll Full Service (managed) payroll special offer. However, our records indicate that you have not yet responded, and we want to ensure that all **Sage 100 customers** have a smooth transition without interruption to your payroll process. To that end, we will now take the following steps:

- Extend the Payroll module expiration date to August 1, 2017, giving you a three-month grace period to select and get up and running on a Sage payroll option.

Act now! Customers must be on a new payroll option by August 1, 2017

- Please contact your Sage business partner or Sage sales representative to select a new payroll option and to get set up with the correct subscription tier.
- Go to your System Configurator to update the same 12-digit key with the new expiration date of August 1, 2017.
 - You will see a notice when you go online to update your key.
 - The sage 100 key will be the same 12-digit key as you had previously, only with the new August 1, 2017 expiration date.
 - If offline, you will need to input the key manually.
